

# NVM uploading instruction

Update NVM:

1. One folder, "NVMSeed", should be created.
2. Copy 568\_NVM.data to the folder of NVMSeed. (If there are many NVM files with different filename, please rename wanted one to 568\_NVM.data)
3. Plug-in USB to TV set
4. Boot up the TV set
5. When system can boot up successfully, 568\_NVM.data has been updated to the TV set.

NOTE: If there is 2<sup>nd</sup>, 3<sup>rd</sup> panel, please note the panel type via SN code and download the right NVM.
